Mitutoyo DCC CMM FN1106 with

LK CAMIO Studio 3D Inspection Software

Metris/LK CAMIO Studio 3D Inspection Software is designed to provide the fastest, yet simplest programming environment for the most advanced measurement applications. Whether you are working with engineering drawings in an on-line programming environment or direct interface to the major CAD vendors, or off-line programming, this product combines easy-to-use functionality and the power of the Windows XP operating system.

Break down the barriers of complex part inspection and increase throughput with these intelligent functions:

**Access the newest technology
for advanced measurement at a
fraction of the price of new!!**

- Configurable user interface
- Wizard-based calibration, alignment and feature inspection
- “Drag and drop” operation for multiple feature tolerancing
- Computer simulation with probe collision detection
- RPS alignment with “Intellidatum”
- Automatic selection of probe head angles
- On-line or Off-line use
- Results compared directly to CAD model
- Single click Instant Reporting with advanced graphical reporting
- IGES Direct CAD Interface
- *Optional* Direct CAD Interface for VDA, STEP, CATIA, ProE, UG, Parasolids
